PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building responsive mobile interfaces, form-based data applications, Firebase-ready architectures, and REST API integrations. Strong foundation in Dart, clean UI implementation, state management, Git/GitHub, and object-oriented programming. Focused on creating practical, user-friendly mobile products and continuously improving software architecture and development quality.

TECHNICAL SKILLS

Mobile Development	Flutter, Dart, Android and iOS application development, responsive UI, Material Design
Backend & Data	Firebase, REST APIs, JSON, form validation, structured data handling, Kobo
Tools & Practices	Git, GitHub, VS Code, debugging, clean code, reusable widgets, Riverpod
Additional	Java, OOP, HTML, CSS, information security fundamentals, data management

SELECTED PROJECTS

Najda Emergency Support App | Flutter, Dart, Firebase-ready architecture

- Designed a responsive emergency-support mobile experience with location-oriented flows, SOS access, trusted contacts, and incident-reporting concepts.
- Implemented reusable UI components and structured application screens focused on fast, clear user interaction.

Household Management System | Flutter, Riverpod, Form Validation

- Built a data-entry application for household registration, family information, vulnerability indicators, validation, and record management.
- Applied Riverpod state management and organized models to keep application data and user interface behavior maintainable.

GIAMS - Gaza International Airport Management System | Java, OOP

- Modeled passengers, employees, pilots, flight attendants, flights, and operational statuses using inheritance, encapsulation, and polymorphism.

EXPERIENCE & TRAINING

Independent Flutter Developer | Project-Based Development | 2026 - Present

- Develop mobile portfolio projects, convert interface ideas into responsive screens, and practice state management, API integration, and structured application architecture.
- Use Git and GitHub for version control, debugging, documentation, and continuous project improvement.

Smart Soft Training | Five-Month Practical Training | Completed

- Worked on application and data-focused tasks, including digital forms, data organization, validation, and practical software workflows.

EDUCATION

Bachelor's Degree in Web Technology and Information Security | Palestine Technical College - Deir Al-Balah

GPA: 82%

COURSES

- Data Integration, Storage and Migration Strategies - Coursera (In Progress)
- Introduction to Data Management - Coursera (In Progress)
- MEAL Essentials - DisasterReady
